PROFILE - FULL STACK DEVELOPER/ENGINEER - BACKEND

Results-driven Full Stack Developer with 4+ years of experience designing and maintaining scalable web applications. Proficient in C#, ASP.NET Core, SQL Server, and React, with a strong focus on building secure, high-performance RESTful APIs and responsive user interfaces. Brings hands-on insurance domain experience and a practical approach to modern engineering workflows. Experienced in building and optimizing **RESTful APIs** and backend services using **C# and ASP.NET Core**

- Experienced in building and optimizing **RESTful APIs** and backend services using **C# and ASP.NET Core**
- Proficient in data access and querying using **Entity Framework, LINQ, and SQL Server**, including stored procedures and query optimization
- Skilled in developing responsive, user-friendly UIs using **React** and modern **JavaScript (ES6+)**
- Hands-on experience with **Azure Cloud** services for application deployment and cloud infrastructure; familiar with **AWS** equivalents
- Experienced in setting up and maintaining **CI/CD pipelines using Jenkins** for automated builds, testing, and deployments
- Domain knowledge in **insurance**, including policy administration, claims processing, and compliance-driven data workflows
- Adept at **data migration** and handling large datasets with accuracy and performance in mind
- Experienced in leveraging **AI tools** to accelerate development, improve code quality, and streamline engineering workflows
- Comfortable working in **Agile/Scrum** environments with cross-functional teams

TECH STACK

Back-End: **.NET MVC, ASP .NET , .NET Web API, WebAPI, ADO .NET , EF - LINQ, MS Graph API**

Front-End: **Java Script, React Js, Redux, Tailwind CSS, NextJs, HTML&CSS , jQuery**

Languages: **C# , JavaScript , Python , SQL, F# ,X++ , Swift C**

Database : **SQL Server, Mongo DB , Azure Cloud SQL, SSIS , SSRS**

Cloud : **Azure Cloud functions - function Apps, Logic Apps , Web Services, DevOps , Blob Storage, Application Insights , Kudu Tools; Github , Jenkins , CI/CD**

PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER , CHUBB (CBSI), HYDERABAD - MAY 2025 - PRESENT

Portfolios:

Financial Business Solutions (CHUBB North America)

iCollect

Technology Used: **.NET Core , SQL Server , ReactJS, SSIS**

- Internal application used by FBS Business facing team to handle transactions made against a policies within Chubb's various policy management systems.

FBS Email Management System

Technology Used: **.NET Core , SQL Server , ReactJS, SSIS**

- Internal applications used by FBS Business facing team to track and monitor emails received from customers, essentially a wrapper application around a MS exchange server which lets the team assign, manage, track emails tagged with a policy

Collateral Management System

Technology Used: **.NET Core , SQL Server , ReactJS, Redux, SSIS**

- Internal applications used by FBS Business facing team to track and manage assets listed as collateral by Chubb's Insured Accounts/Customers, giving analysts ability to add assets , manage exposure ,deviation etc.,

FULL STACK DEVELOPER, KAGOOOL DATA, HYDERABAD - APRIL 2022 - APRIL 2025

Projects Worked On:

Konnect CRM System *(May 2022 - Nov 2022)*

Technology Used: **JavaScript - jQuery , jqGrids ; ASP .Net MVC ; MS SQL DB ; Azure Cloud**

- Timesheet project was developed to track Employee time booking on daily basis along with features like Leave Management, Employee Management, Project management Modules with Rich UI elements.
- Key functionalities of this project are generating PBI Reports on Monthly basis by calculating Employee time booking on each project.
- Worked on ITSM Module – where we will be issuing the tickets based on the employee request.
- These tickets will be assigned to users based on the issue category.

Smiths File Manager *(Dec 2022 - Mar 2023)*

Technology Used: **JavaScript - jQuery , jqGrids ; ASP .Net MVC ; MS SQL DB ; Azure- AD, Blob Storage, SQL, Function Apps**

- This is a File Sharing Application which can be used by users round the globe which is built in .NET with Azure AD authentication in co-operation with Oracle Service Cloud (OSC) to upload huge files into Azure Blob Storage.
- Key functionalities are file upload using SASS tokens and file maintaining with option to view versions against each file.
- Worked on bugs fixes, UI upgrade and C2C migration of project from Smiths Medical to ICU Medical
(Smith's Medical division was acquired by ICU medical in Jan 2022)

SAP Chat Bot *(Apr 2022 - Jul 2023)*

Technology Used: **.NET Core , Node JS , Microsoft Bot Framework , SAP APIs, SQL Server**

- We fetch the Vendor, Warehouse, Shipping data etc from SAP using the custom APIs.
- These APIs are integrated with the Chat Bot so that, without any manual intervention, one can fetch the data by interacting with the Chatbot.
- Chat Bot was developed using C#, in-cooperation with Microsoft Bot Framework.

Intelligent Data Platform Portal – Al Futtaim Group (August 2023 - Mar 2025)

Technology Used: **JavaScript - jQuery , jqGrids , ASP .Net MVC, MS SQL DB, Azure- WebService, Active Directory ,Blob Storage, SQL Server, Function Apps, Azure Data Factory , Databricks**

- IDP – Metadata Driven Framework is a web application developed as alternative to the existing Microsoft's Azure Data Factory with more customization and features to manipulate data as per the client's requirement
- Key functionality of the WebApp includes creating robust data pipelines that ingest data from multiple sources like SAP or OSC and perform required transformation on the ingested data and place them into Azure Data Lake.
- Additional features of the application are to provide real time updates and data insights on the running ingestion pipelines in the any form possible including Tables, Graphs, excel reports and PowerBi reports, restricts user access to sensitive data by assigning roles, having a Centralized access management module to make it easier for administrators to provide access to users with a click instead of using Azure portal to add them to relevant AD groups etc.,

PERSONAL PROJECTS

EXPENZE.APP

Frustrated with expensive subscription apps for finance tracking , I built Expenze over a weekend, as a personal finance tracker SPA (Vite + React 19 + TypeScript) with Supabase/PostgREST backend, covering transactions, budgets, recurring rules, fuel logs, and multi-account transfers with row-level security.

Shipped advanced features including AI-powered spending insights via Gemini (Supabase Edge Functions), CSV bulk import, offline-first sync with operation queuing, PWA theming, and drag-and-drop customization.

EDUCATION

❖ BACHELORS OF TECHNOLOGY, GITAM (DEEMED TO BE UNIVERSITY), HYDERABAD
JUNE 2018 — APRIL 2022

Graduated in Electrical, Electronics and Communications -CGPA 7.55

SKILLS

Administrative Skills: Analytical Thinking, Problem Solving, Team Leadership, Tolerant & Flexible, Strong Communication
