Employment History

Full Stack Developer at Kagool Data, Hyderabad

MAY 2023

Projects Worked On:

Konnect CRM System

- Timesheet project was developed to track Employee time booking on daily basis along with features like Leave Management, Employee Management, Project management Modules with Rich UI elements.
- Key functionalities of this project are generating PBI Reports on Monthly basis by calculating Employee time booking on each project.
- Worked on ITSM Module – where we will be issuing the tickets based on the employee request.
- These tickets will be assigned to users based on the issue category.

Smiths File Manager

- This is a File Sharing Application which was can used by users round the globe which is built in .NET with Azure AD authentication in co-operation with Oracle Service Cloud (OSC) to upload huge files into Azure Blob Storage.
- Key functionalities are file upload using SAS tokens and file maintaining with option to view versions against each file.

SAP Chat Bot

- We fetch the Vendor, Warehouse, Shipping data etc from SAP using the custom APIs.
- These APIs are integrated with the Chat Bot so that, without any manual intervention, one can fetch the data by interacting with the Chatbot.
- Chat Bot was developed using C#, in-cooperation with Microsoft Bot Framework.
